FEEDING DIRECTIONS

Feed at the rate of 1.0 Lb. per 100 Lbs. of body weight to provide 22.7mgs. of Decoquinatone per 100 Lbs. of body weight per day. Feed for at least 28 days during periods of coccidiosis exposure or when experience indicates that coccidiosis is likely to be a hazard. Provide plenty of fresh clean water at all times.

WARNING: Do not feed to sheep producing milk for food.

CAUTION: Do not use in feeds containing Bentonite. No copper compounds are added to this feed. However, naturally occurring copper in feed ingredients may combine to yield detectable copper levels. Care should be taken to minimize additional copper from forage, water or other feed stuffs available to sheep. Use only as directed. This feed contains a source of non-protein nitrogen. The equivalent protein supplied by non-protein nitrogen should not exceed 1/3 of the crude protein of the total rating.
