NOTES: Add antibiotics for growth promotion and disease control.  
CAUTION: Follow instructions. The Addition to feed of higher levels of selenium than provided for in the instructions is not permitted. Store feed in a clean dry place protected from rodents, insects and strong odors. Moldy or insect infested feed may cause illness or death. Strong odors may be picked up by the feed and cause a reduction in intake. Use grain that has been properly dried and stored. Grain that shows signs of mold should be avoided. When grain is processed by grinding or crimping mold activity increases dramatically and can produce severe problems within hours.
